Dear Sirs

I am opposed to the following Planning Application.

Re: APP/C1435/W/23/3335625

I am writing to reiterate my views that were stated in my previous letter to Wealden District Council about:

Risk of Flooding:

This land is a Floodplain.

During adverse weather conditions this land often resembles a lake. So does the land, likewise, west of the A22. There are also several pieces of land close by to the proposed development land that retain exceptional amounts of surface water during the long periods of rain that now fall due to climate change.

If you build on this land where will that water go?

It will flood the surrounding residential homes and they do not deserve that.

Yours sincerely
