To whom it may concern

We would like to oppose the idea by the National Planning Policy Framework regarding the Wealden area 7km. and 15km. zone of influence around the Ashdown Forest spa and sac.

The results, if this goes ahead, is lower growth in the area, less jobs – especially for the young, further house price inflation. We feel there are already enough obstacles to overcome as far as planning in concerned, and believe the planning policy should promote a strong, vibrant and healthy community by providing housing, good design and local services to support health and well-being.

Due to the current economic climate, jobs are hard enough to come by at the moment and if this goes ahead, people will be priced out of the housing market and will be forced to leave the area they have grown up in because of the lack of jobs and houses.

We are all for a community where local enterprise thrives and which provides opportunities for people to work within their community, reducing the need to commute and increase our carbon footprint.

If this does go ahead, it will have a great detrimental effect on this company, resulting in the loss of many of our employee's jobs at our two Crowborough sites, and this, in turn, would mean us travelling further to find work, increasing our carbon footprint as a result.

Furthermore, we, nor anyone in our organisation, saw anything about making representations about this in any paper or literature.

Yours sincerely

Joby Coppard
Director
