28 April 2012

Dear Councillors

RIDGEWOOD FARM DEVELOPMENT

I write to let you know that I am deeply disturbed by the prospect of this development.

I have received no information about it from the Council and there has been no adequate consultation process.

The prospect of another 1000 houses will have seriously detrimental effects in terms of school places, water supply, medical services and high street traffic congestion (though I am no longer a driver, the existing traffic flows through the town centre already make life very difficult for the pedestrian –especially the elderly).

I urge you to seek a re-opening of the consultation period and to hold further public meetings at which existing residents can express their views.

Yours faithfully

D T Richards
