Rotherfield Parish
Proposed Modifications to the Core Strategy Development Plan Document

At the recent Planning Committee meeting the impact of modification MM33 re: the Ashdown Forest SPA/SAC/SSI on the Parish was discussed. It was resolved to make the following comments:-

<!--[if !supportLists]--> i. <!--[endif]-->The proposals would have a negative effect on initiatives to provide â€œholiday letsâ€ and holiday accommodation in the area and impact on the businesses and communities that serve these. It is considered that there are many other reasons for visiting the area other than to view the Ashdown Forest, for example golf, fishing and sightseeing.

<!--[if !supportLists]--> ii. <!--[endif]-->As a prime source of the Nitrogen deposits is vehicle movements other mitigation methods should be implemented such as steps to reduce heavy vehicle movements on the roads penetrating the Forest, in particular the A22.

Rotherfield Parish Council - Response to Proposed Modifications to the Core Strategy Development

This was discussed at last night's Planning Committee meeting. It was resolved to comment that the changes proposed will have little or no impact on the Parish and much of the information is too technical to pass judgement on.
