Dear Mr Carvey.

I am responding to the flyer delivered by a representative of The Ridings Action Group.

I was not able to attend Wealdon Council meeting on 11th Feb as I was away.

I would like to address the many problems which will arise if this proposed development comes to fruition. The roads around the development are too narrow and this will cause traffic jams into the town from all directions. I understand the A22 will not be widened to cope with the increase of traffic This section of the A22 is normally quite busy. The roads all around the Ridgewood area were not made to take the volume of traffic which it now has to cope with. They are wearing out. What will happen if more vehicles, private and commercial have to use them.

I understand the main entrance to the propose site is form the A22. Do the planners honestly believe that everybody will use this access? I can assure you they will not. The current access I believe is from the Lewes Rd. If another daft mini roundabout is put on this section it will create even more havoc adding to the chaos and dangers that now exist from the two recent roundabouts.

The Farm is Agricultural. Once built on another part of Rural Land will be lost forever. A very important point.

The town and the surrounding area cannot sustain this large influx of people and the facilities they expect in this day and age.

I am against any Development of Ridgewood Farm It is creeping development by the back door.

Yours sincerely Mrs R Ryman
