Appendix 1: Projected Delivery of Housing Developments with Planning Permission (small sites with 9 or less (net) units) as of 1 April 2022 19

Appendix 2: Projected Delivery of Housing Developments with Detailed Planning Permission (major sites with 10 dwellings or more (net) within Wealden District as of 1 April 2022) 37

Appendix 3: Projected Delivery of Housing Developments with Outline Planning Permission (or Resolution to Grant Planning Permission) for Major Development within Wealden District as of 1 April 2022 39

Appendix 4: Projected Delivery/Loss of Use Class C2 Accommodation with Detailed or Outline Planning Permission (or Resolution to Grant Planning Permission) within Wealden District as of 1 April 2022 41

1. Introduction

1.1 It is a legal requirement[1] that where planning policies identify an annual number of dwellings to be delivered in a district that this is set out in the Council's Authority Monitoring Report (AMR) for their current plan period (the adopted Wealden District Core Strategy Local Plan[2] runs until 2027). Furthermore, the National Planning Policy Framework (NPPF) (July, 2021) confirms that strategic policies should include a trajectory illustrating the expected rates of housing delivery over the plan period, and that all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites. Paragraph 74 of the NPPF states that local planning authorities:

'*should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old[3]'.*

1.2 The following housing land supply statement summarises the main outcomes of housing provision within Wealden District and provides the current position of Wealden District Council in relation to its housing requirement and land supply for the monitoring period, including its five-year housing land supply position as of the 1 April 2022 under the NPPF.

1.3 As such this document fulfils the following functions:

- It meets the NPPF requirement to annually monitor housing delivery;
- It provides guidance to developers and other interested parties on the current supply of housing sites within district; and
- It provides information on the anticipated delivery ('trajectory') of housing development in Wealden District.

2. Housing Land Supply and Housing Trajectory

Wealden's Current Housing Requirements

2.1 Policy WCS1 (Provision of Homes and Jobs 2006-2027) of the Wealden District Core Strategy Local Plan (February, 2013) sets a housing target of 9,440 dwellings over the period 2006 – 2027, which equates to 450 dwellings per annum (dpa). The Council accepts that the evidence base underpinning

[1] See the Town and Country Planning (Local Planning) (England) Regulations 2012 under Regulation 34(3).

[2] Wealden District Core Strategy Local Plan (adopted February 2013)

[3] Unless these strategic policies have been reviewed and found not to require updating. Where local housing need is used as the basis for assessing whether a five-year supply of specific deliverable sites exists, it should be calculated using the standard method set out in national planning guidance.

housing need within the adopted Wealden District Core Strategy Local Plan (February, 2013) is out of date. National planning policy states that Local Plans over five years old cannot be said to have up-to-date housing requirement policies.

2.2 Paragraph 61 of the NPPF (July, 2021) states that to determine the minimum number of homes needed within the local authority area, strategic policies should be informed by a local housing need assessment, conducted using the standard method in the planning practice guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals. A five-year housing land supply position for Wealden District Council (as of 1 April 2022) has therefore been based on the 'standard method' for calculating housing need, given that the Council's own adopted housing requirement policy is now considered out of date.

2.3 This calculation aligns with the planning practice guidance[4] and sets a baseline using the 2014 Household Growth Projections between 2022 and 2032 for Wealden District, an adjustment to take account of affordability (using median workplace-based affordability ratio for Wealden District (2021) and a cap for a level of increase based on affordability. This calculation produces a housing needs requirement for Wealden District of **1,212** dwellings per annum (dpa) and is shown in full below.

[4] See PPG – Paragraph: 004 Reference ID:2a-004-20190220

Figure 1 - Standard Method for Calculating Housing Needs within Wealden District (2022-2032)

Step 1 – Setting Baseline, 2014 Household Growth Projections

Year	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032
Household Growth Projections	73	74	75	75	76	77	78	79	80	81	81
Expanded Household Growth Projections	72773	73664	74551	75421	76302	77179	78050	78919	79767	80612	81431
Projected Annual Household Growth for Ten Year Period		891	887	870	881	877	871	869	848	845	819

Total Household Growth for Ten Year Period	8658
Projected Average Annual Household Growth over a Ten Year Period	**866**

Step 2 – An Adjustment to take Account of Affordability

Median Workplace-Based Affordability Ratio for Wealden District (2021)	13.76
Adjustment Factor	1.61
Adjustment Factor Multiplied by Projected Average Annual Household Growth	**1,394**

Step 3 – Capping the Level of any Increase

The Wealden District Council Core Strategy was adopted in February 2013 and is therefore considered out of date, so the following steps are applied.

Average Annual Household Growth over 10 years (Step 1)	866
The Minimum Annual Local Housing Need Figure (Step 2)	1394

The cap is set at 40% above the most recent average annual household growth figure (i.e. step 1) or at the minimum annual local housing need figure (i.e. step 2).

Average Household Growth Cap = 866 + (40% x 866)	**1,212.4**

The capped figure is lower than the minimum annual local housing need figure and therefore limits the increase to the local authority's minimum annual housing need figure. Therefore, the minimum housing target for **Wealden District is 1,212 dpa**.

2.4 It should be noted that the Planning Practice Guidance (PPG)[5] explains that the 'standard method' for calculating the housing needs requirement for local authorities already takes account of historic undersupply. It states that the affordability adjustment is applied to take account of past under-delivery. The standard method identifies the minimum uplift that will be required and therefore it is not a requirement to specifically address under-delivery separately.

Housing Delivery Test (HDT) Results

2.5 The Housing Delivery Test (HDT) was first introduced with the NPPF that was initially published in July 2018 and most recently revised in July 2021[6]. The mechanisms for the HDT were outlined within the revised NPPF and in the Housing Delivery Test Measurement Rule Book[7] and has been applied across all local planning authorities in the country (with the exception of National Parks). This mechanism was introduced as a way to monitor whether local planning authorities are building enough homes to meet their respective housing requirements over a three-year period.

2.6 Paragraph 74 of the NPPF states that local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement as set out in their adopted strategic local plan, or against their local housing need requirements where the strategic policies are more than five years old. It notes that the supply of specific deliverable sites should in addition include a buffer (moved forward from later in the Plan period) of:

- 5% - the minimum buffer for all local authorities, necessary to ensure choice and competition in the market for land, where they are not seeking to demonstrate a five-year housing land supply; or
- 10% - where the local planning authority wishes to demonstrate a five-year supply of deliverable sites through an annual position statement or recently adopted local plan, to account for any fluctuations in the market during that year; or
- 20% - where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving planned supply[8].

[5] See PPG – Paragraph: 011 Reference ID: 2a-011-20190220

[6] See paragraph 76 of the NPPF (July, 2021)

[7] Housing Delivery Test Measurement Rule Book (July 2018)

[8] Footnote 41 of the NPPF (July, 2021) confirms that this will be measured against the HDT, where this indicates that delivery was below 85% of the housing requirement.

2.7 The PPG[9] states that for local planning authorities which deliver less than 85% of their identified housing requirement, a 20% buffer will be added to their housing land supply, with immediate effect from publication of the HDT results. Only a 5% buffer would apply where the local planning authority has results of at least 85% for its HDT and where they are not seeking to demonstrate a five-year housing land supply position.

2.8 Table 1 below outlines the sanctions and consequences for local planning authorities that do not deliver against their housing requirements.

Table 1: HDT Sanctions over Time

Date From	% delivered of annual housing requirement	Sanctions
November 2018 and onwards	< 95%	Action Plan
November 2018 and onwards	< 85%	20% land buffer
November 2020 and onwards	< 75%	Presumption in favour of sustainable development

2.9 The total number of homes delivered by Wealden District Council during the three-year period under the latest HDT measurement (2021) between 2018-19 and 2020-21 was 2,618 (net) dwellings, whilst the total number of homes required over the same period was 3,179[10]. Therefore, the HDT measurement for Wealden District Council in 2020 was 82%[11].

2.10 The implication of this result means that the Council is still required to use a 20% buffer for its five-year housing land supply position. Therefore, the Council can confirm that it's five-year housing land supply requirement, incorporating the 'standard method' under the NPPF (July, 2021) is as follows in Table 2 below.

[9] See PPG – Paragraph: 022 Reference ID: 68-022-20190722

[10] The first national lockdown for Covid-19, announced on 23 March 2020, was an unprecedented event which saw temporary disruption to local authority planning services and the construction sector. This was reflected by the Government's HDT measurement for 2020 that saw a reduction for all local authorities in the 'homes required' within the 2019-2020 year by a one month.

[11] Housing Delivery Test: 2021 Measurement

Table 2: The Five-Year Housing Land Supply Requirement under the 'Standard Method'

Wealden District Council Five Year Land Housing Requirement – Standard Method	
Five Year Housing Requirement (i.e. 1,212 x 5)	6,060 (net) dwellings
20% buffer (20% of 6,060)	1,212 (net) dwellings
Five Year Housing Requirement including buffer	**7,272 (net) dwellings**

Five Year Housing Land Supply and Deliverable Sites

2.11 Wealden District Council is able to update its five-year housing land supply and delivery position for 1 April 2022. The NPPF requires that sites included in the five year supply calculation should be 'deliverable'. This is defined in the glossary[12] as the following:

'To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:

a. Sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans); and

b. Where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on sites within five years.

2.12 Major development for housing is defined as:

'development where 10 or more homes will be provided, or the site has an area of 0.5 hectares or more'.

2.13 The PPG[13] confirms that sites that fall within the latter category, such as sites with extant outline planning permissions for major development, may require

[12] National Planning Policy Framework (NPPF) (July, 2021), Annex 2: Glossary

[13] See PPG – Paragraph 007: Reference ID: 68-007-20190722

further evidence to be considered deliverable and this may include the following:

- current planning status - for example, on larger scale sites with outline or hybrid permissions, how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers' delivery intentions and anticipated start and build-out rates;
- firm progress with site assessment work; or
- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.

2.14 The components of the Council's five-year housing land supply position have been set out in the appendices to this five-year housing land supply statement. They set out the sites which are expected to deliver housing completions between 1 April 2022 and 31 March 2027.

2.15 Appendix 1 is a list of sites of 1-9 (net) dwellings that either have outline or detailed planning permission as of 1 April 2022. Those sites with 5 or more (net) dwellings have been detailed with a timeline for their completion in the next five-year period and also whether they have commenced works on the site (this is indicated by the paler green/blue colour for those sites which have commenced). Those sites with 4 (net) dwellings or fewer have simply been listed. The total number that falls into this category amounts to 941 dwellings (net).

2.16 Appendix 2 is a list of sites with 10 or more (net) dwellings which have detailed planning permission and/or are under construction as of 1 April 2022. Those sites which have commenced as of 1 April 2022 are outlined in a paler green/blue colour and incorporates the majority of sites in this category. The total number of net dwellings that falls into this category and are anticipated to be delivered within the next five-year period is 2,512.

2.17 It is Council's position that all sites in Appendix 1 and 2 should be considered deliverable as there is no clear evidence that those homes will not be delivered within the five-year period. This amounts to 3,453 (net) dwellings in total.

2.18 Appendix 3 sets out a list of sites which either have outline planning permission for major development or are subject to a resolution to grant planning permission (subject to a Section 106 Agreement), and where there is

clear evidence that the homes will be delivered within the next five-year period. The total amount of net dwellings that fall into this category and are expected to come forward within the first five-year period amounts to 2,129.

2.19 Appendix 4 sets out a list of sites that involves the proposed loss or gain in older person's accommodation (Use Class C2) that can now be taken into account for the Council's five-year housing land supply position. The PPG[14] confirms that local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, as part of our housing land supply. This contribution is based on the amount of accommodation released in the housing market and the average number of adults living in households that was 1.8 at the time of the 2011 Census. This is the figure that has been used to translate bed spaces to dwellings (Use Class C3) in line with planning practice guidance.

2.20 The total amount of net dwellings (equivalent) that fall into this category and are expected to come forward within the first five-year period amounts to 111. It should be noted that the scheme at Bircholt Retirement Home, Ninfield has resulted in the loss of 26 bed spaces (Use Class C2), or the equivalent of 14 dwellings and is only being replaced with 6 (net) dwellings (Use Class C3) so has resulted in a net loss overall. The second scheme at Little Mount Farm, Frant resulted in the gain of 146 bed spaces (Use Class C2) and the loss of a single dwelling. The remaining scheme at Land to the West of Stone Cross Garden Centre results in the gain 70 bed spaces (Use Class C2) equivalent to 39 (net) dwellings.

The Covid-19 Pandemic and Housing Delivery Rates

2.21 It should be noted that the Covid-19 pandemic has continued to have a lasting impact on the delivery rates on sites across Wealden District during the 2021/22 monitoring period. The national lockdown introduced on 23 March 2020, resulted in the complete closure of construction sites for the foreseeable future. The lockdown was lifted for the construction and manufacturing industry in mid-May 2020; however, the impact on housing delivery rates continues to be profound. This is largely due to the impact of lockdowns on global supply chains, which has helped to cause a significant shortage of some building materials and products required in the construction industry.

2.22 During the 2021/22 monitoring period, there were 685 (net) dwelling completions, which is marginally lower than the 722 net dwelling completions achieved in the 2020/21 monitoring period and significantly lower than the 1034 (net) dwelling completion achieved in the 2019/20 monitoring period. Table 3 above demonstrates that in comparison to previous years, the delivery rates on the district's largest sites has also fallen. For example, this is

[14] See PPG – Paragraph 035: Reference ID: 68-035-20190722

clearly demonstrated for the Land East of Park Road, Hellingly site, which achieved 176 (net) dwelling completions in the 2019/20 monitoring but could only deliver 39 (net) dwelling completions in the 2020/21 monitoring period and has only risen to 75 (net) dwellings in the 2021/2022 monitoring period.

2.23 The government did seek to mitigate the impact of the Covid-19 pandemic on delivery rates in the construction industry for the 2021/22 period. The government subtracted four months from the 2021 HDT calculation for the 2020/21 period to account for potential fluctuations in construction output.

2.24 The government also introduced the Business and Planning Act 2020[15], which resulted in the extension of most full and outline planning consents which were due to expire between 23 March 2020 and 31 December 2020, to the 1 May 2021. This has assisted developers by giving them additional time to implement schemes that had been delayed by the Covid-19 pandemic and lockdown.

2.25 The Council has continued to support developers throughout the Covid-19 pandemic and its aftermath in order to ensure that development is brought forward across the district and that the five-year housing land supply requirement is met in the future. The Councils' development management team effectively adapted to the working from home mandate, continuing to offer pre-application advice, as well as continuing to determine planning applications via virtual Planning Committees. During the 2021/22 monitoring period, the Council has continued to build on the experience during Covid-19 and has implemented agile and digital working whilst continuing to support developers in bringing appropriate development forward within the district

Economic Climate and Market Conditions

2.26 The health of the world economy has been detrimentally impacted by a number of factors throughout the 2021/22 monitoring period that will ultimately have a significant impact on the delivery of housing development within Wealden District and the UK as a whole. These issues include the global energy crisis, with much of the world facing shortages and increased prices in oil, gas and electricity markets, following the gradual opening up of the world economy after the Covid-19 pandemic. Furthermore, the UK economy has seen inflation rise rapidly during the 2021/22 monitoring period and beyond, thereby increasing the costs of materials and other products required to support the construction industry. These issues have been further exacerbated by the war in Ukraine, which has driven global energy prices and inflation rates higher following subsequent sanctions and restrictions on Russia.

[15] Business and Planning Act 2020

2.27 The UK economy has been particularly impacted by the global economic downturn and faces nationally specific issues. These include the continuing impacts of Britain's exit from the European Union, higher levels of inflation in comparison to countries of a similar economic size, the weakening of the British Pound against the United States Dollar, the increased level of strikes across the workforce and the looming threat of a long recession. It is accepted that the economic impact of some of these factors on housing delivery rates is still uncertain, given they have occurred towards the latter end of the 2021/22 monitoring period.

2.28 The health of the economy and the strength of the housing market will always be a major factor for the supply of housing. In terms of the previous economic recession period (between 2008 and 2013), net housing completions actually rose substantially from an average of 367 dpa between 2007/08 to 2009/10 to an average of 667 dpa between 2010/11 to 2012/13. Following the adoption of the Wealden District Core Strategy Local Plan in February 2013 and the associated housing target of 9,440 dwellings between 2006 and 2027 (or 450 dpa), housing delivery rates have consistently exceeded this housing target, with an average delivery rate of 663 dpa between 2013/14 and 2021/22.

2.29 In general terms, the above figures illustrate that previous housing completion rates within the district have largely been resilient to downturns in the national economy and in the case of the years following the adoption of the Wealden District Core Strategy Local Plan, have been exceeding the locally adopted housing target planned for, even during the Covid-19 pandemic.

2.30 In terms of site viability, Wealden District Council has adopted the Community Infrastructure Levy (CIL) in 2015 (with the CIL Charging Schedule becoming effective on 1 April 2016), where it was considered by the Planning Inspectorate to provide an appropriate basis for the collection of the levy in the district and was set at a level that would not put the overall development of the area at risk. The Council, as part of the new Local Plan process, has commissioned a new financial viability study to consider the new policies within the Local Plan. This will incorporate both a review of the existing CIL Charging Schedule and local/national planning policies at that time (including affordable housing) to assess whether the plan as a whole would jeopardise the viability of identified housing sites in general terms. This study will seek to confirm that specific residential development sites in the district (including new housing allocations) are economically viable, given the obligations in place/proposed at that stage.

2.31 Despite the national economic issues raised above, evidence on housing delivery in the district does support the Council's assumptions with regards to the robustness of the sites included in the supply, including lead in times and past delivery rates and this is considered below.

Past Housing Delivery Rates and Lead in Times

2.32 In terms of recent housing delivery rates and lead in times, specifically from the determination of the initial outline planning application to the first housing completions, the Council has identified a number of sites with extant planning permissions that have commenced and yielded some housing completions at least by the 2021/22 monitoring period in Table 3 below. This is to demonstrate both the relatively short lead in times for major sites with outline planning permission, and moreover, historic delivery rates for larger housing sites within the district. A total of ten housing sites have been identified, split between sites with over 200 dwellings total and sites of between 100 dwellings and 200 dwellings total.

2.33 Table 3 below shows lead in times and actual delivery rates for four developments of over 200 dwellings (gross) within Wealden District. This includes two sites to the north of Hailsham, a single site in Stone Cross and a single site in Uckfield. The table also shows lead in times and actual delivery rates for six developments of between 100 and 200 dwellings (gross) within Wealden District. This includes two sites at Hailsham, two sites in Stone Cross and a single site in both Heathfield and Crowborough. All the developments were initially granted outline planning permission following the adoption of the Wealden District Core Strategy Local Plan in February 2013.

Table 3: Delivery Rates and Lead in Times for Large Sites within Wealden District

Sites with Extant Planning Permission of 200 dwellings +

Site Name	Initial Outline Planning Permission Granted	Total (Gross)	13/14	14/15	15/16	16/17	17/18	18/19	19/20	20/21	21/22
Land West of Park Road, Hellingly	02/10/2013	240	0	0	0	47	86	28	33	20	7*
Land East of Park Road, Hellingly	30/04/2014	460	-	0	0	0	0	76	176	39	75
The Wells, Rattle Road, Stone Cross	28/10/2013	276	0	0	8	85	82	87	14*	-	-
Land West of Uckfield	24/03/2016	1,000	-	-	0	0	0	3	50	45	35

Sites with Extant Planning Permission of between 100 and 200 dwellings

Site Name	Initial Outline Planning Permission Granted	Total (Gross)	13/14	14/15	15/16	16/17	17/18	18/19	19/20	20/21	21/22
Land at Walsh Manor Farm, Crowborough	18/12/2015	160	-	-	0	0	0	5	65	31	59*
Land off Mill Road, Hailsham	01/06/2016	183	-	-	-	0	0	63	63	35	22*
Land Rear of Police Station, High Street, Heathfield	26/02/2014	115	0	0	0	0	20	57	38*	-	-
Land South of Rattle Road, Stone Cross	09/04/2013	120	0	0	0	0	53	51	16*	-	-
Land off Amberstone, A271, Hailsham	14/10/2016	110	-	-	-	0	0	31	62	17*	-
Land at Uplands Farm, Rattle Road, Stone Cross	14/04/2016	183	-	-	-	0	0	0	0	13	52

*The site has now completed.

2.34 Table 3 demonstrates that all ten housing sites, from when outline planning permission was granted, were able to deliver new homes within the first five years following an outline planning permission, with three sites delivering new homes on the third year, three sites delivering new homes on the fourth year and four sites delivering new homes on the fifth year. This demonstrates that even the largest of sites in Wealden District, such as Land West of Uckfield (1,000 (net) dwellings) has seen dwelling completions just over three years after the initial outline planning application was determined. This shows that lead-in times are relatively short in Wealden District from the initial outline planning permission to the first housing completions on site, which typically takes between 3 and 5 years. This is in part due to the rural nature of the district and lack of previously developed land, with many housing development sites coming forward on greenfield land. It is therefore considered that sites with outline planning permission in Wealden District will come forward promptly, with some housing completions in the initial five-year housing land supply period, particularly in years 3, 4 and 5.

2.35 In terms of housing delivery rates, it is shown that three of the four sites of over 200 dwellings have exhibited delivery rates of 76 dpa and above (the highest rate recorded being 176 dpa at Land East of Park Road, Hellingly in the 2019/20 period). It should be noted that there was a clear downturn for the 2020/21 period, but this was expected given that the Covid-19 pandemic cause closures of construction sites in 2020 specifically. For the smaller sites of between 100 and 200 dwellings, all of the sites have exhibited delivery rates of over 50 dpa and above (the highest rate recorded being 65 dpa for Land at Walsh Manor Farm, Crowborough in the 2019/20 period). The Council has therefore sought to use delivery rates of 75 dpa for housing sites of 200 dwellings or over and delivery rates of 50 dpa for housing sites of between 100 and 200 dwellings as a guide for new housing development coming forward, unless evidence from previous years dictates a different figure.

2.36 It should be noted that each individual housing site below 100 dwellings and over 5 (net) dwellings have also been considered in terms of their lead in times and delivery rates. This will vary from site-to-site dependant on their scale and the type of permission granted (i.e. a full planning permission would normally be quicker than the outline planning permission and reserved matters process), but would be limited to 30 dpa for sites under 100 (net) dwellings, unless evidence from previous years dictates a different figure.

2.37 The monitoring of completion rates for individual housing sites each year may suggest that some housing developments should diverge from the delivery rates identified in order to reflect actual completion rates as they emerge. This is routinely reviewed each year and is updated in accordance with actual housing completions if necessary. It should be noted that the Council has a dedicated monitoring officer for both housing and employment development

who regularly checks new housing commitments and commencement notices, as well as visiting larger housing sites (i.e. 5 (net) dwellings or above) at least once a year to check published completion rates. This ensures that the Council's records are accurate in terms of delivery rates and lead in times on individual sites.

The Council's Five-Year Housing Land Supply Position

2.38 Given the above, the calculation of the five-year housing land supply position as of the 1 April 2022, in line with the NPPF as shown below.

Table 4: Wealden District Five Year Housing Land Supply Calculation for 1 April 2022 (with 20% buffer)

Housing Requirement and Supply for period between 1 April 2022 and 31 March 2027	
Five Year Housing Requirement	6,060 (net) dwellings
20% buffer (20% of 6,060)	1,212
Five Year Housing Requirement including buffer	7,272 (net) dwellings
Total Housing Land Supply (Projected Net Housing Completions)	7,697 (net) dwellings
Five Year Housing Land Supply (Projected Net Housing Completions)	5,693 (net) dwellings
Projected Completions above/below requirement	-1,579
Five Year Housing Land Supply against Requirement	3.92 years (or 78.3%)

2.39 It can therefore be seen that there are 5,693 (net) dwellings on identified sites that are considered available, suitable and available now for the five-year period, which is some 1,579 (net) dwellings less than the 7,272 (net) dwellings required to be deliverable (inclusive of a 20% buffer). This equates to 3.92 years of housing land supply, which is a modest improvement when compared to the 3.66 years supply as of 1 April 2021 that was previously reported.

2.40 It is therefore concluded that there is currently an insufficient supply of 'deliverable' housing sites to meet the Council's five-year housing land supply requirement in accordance with paragraph 74 of the NPPF (July, 2021).

2.41 As outlined in Table 4 above, the Council does have a total housing land supply of 7,697 (net) dwellings, but can only demonstrate that it can deliver 5,693 (net) dwellings over the next five year period between 2022/23 and 2026/27. This stresses the importance of both delivery rates and lead-in times for housing development and the requirement to have a rolling supply of new homes on a yearly basis.

2.42 As is highlighted in the above sections, in Wealden District, it normally takes between 3 and 5 years to deliver new homes following the granting of outline planning permission for major residential development. It is also noted that delivery rates on new housing sites rarely go beyond 100 dwellings per annum (dpa), meaning that some large housing sites will take a significant amount of time to deliver. It should be noted that there may be exceptions to this scenario where there are multiple housebuilders on a single large strategic site. The government is now actively monitoring the delivery of new homes, and this has become a more prominent issue for us following the first HDT test published in 2018.

2.43 The HDT measurement in 2021 for Wealden District Council was published on 14 January 2022, resulting in a measurement of 82% delivery against its housing requirement. This has resulted in a 20% buffer being applied to Wealden District Council's five-year housing land supply requirement. Furthermore, given the HDT result was below 95%, a Housing Action Plan was also required to be published. This document is intended to identify the reasons for under-delivery, explore ways to reduce the risk of future under-delivery and sets out measures the local authority intends to take to improve levels of housing delivery. The latest Housing Action Plan for Wealden was published in June 2022[16].

2.44 Section 4 of the Housing Action Plan focuses on the intervention options open to the Council, recognising that a wide range of partners will need to be involved in helping to achieve the objectives of the Housing Action Plan, including landowners, developers, registered providers and development bodies, as well as infrastructure providers, to ensure that more new housing is delivered within Wealden District. This will in turn support the Council's objective of both gaining and maintaining a five-year housing land supply position in the future.

2.45 The appendices below provide detailed information on individual sites that are considered to make up the Council's five-year housing land supply position and provides a timeline for their development (with the exception of sites of 4 (net) dwellings or below that are simply listed).

[16] Wealden District Council Housing Action Plan (June, 2022)

Appendix 1: Projected Delivery of Housing Developments with Planning Permission (small sites with 9 or less (net) units) as of 1 April 2022

*As explained in paragraph 2.19 of this report, the PPG confirms that local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, as part of our housing land supply. This contribution is based on the amount of accommodation released in the housing market and the average number of adults living in households that was 1.8 at the time of the 2011 Census. This is the figure that has been used to translate bed spaces to dwellings (Use Class C3) in line with planning practice guidance.
