Dear Planning Policy

Thank you for consulting the Environment Agency on the Horam NP (Regulation 16).

We are a statutory consultee in the planning process providing advice to Local Planning Authorities and developers on pre-application enquiries, planning applications, appeals and strategic plans.

We aim to reduce flood risk, while protecting and enhancing the water environment. We have had to focus our detailed engagement to those areas where the environmental risks are greatest.

You have confirmed that there will be no development coming forward as part of this plan. Therefore, based on the information currently available, the proposed NP raises no environmental concerns for us.

We trust that the above information is of assistance.

Please note: this response is based on the information you have made available at this time. It is based on current national planning policy, associated legislation and environmental data / information. If any of these elements change in the future, then we may need to reconsider our position.

Kind regards
