A horizontal bar chart titled 'U.S. should take action to reduce greenhouse gas emissions'. The y-axis lists age groups: 18-29, 30-49, 50-69, 70+, and 'All adults'. The x-axis represents the percentage of respondents, ranging from 0 to 100 in increments of 20. For each age group, there are two bars: a blue bar for 'Men' and an orange bar for 'Women'. The data shows that in all age groups, a majority of respondents believe the U.S. should take action to reduce greenhouse gas emissions. The percentage of respondents who believe in taking action is generally higher among younger age groups and among women compared to men.

Age Group	Men (%)	Women (%)
18-29	85	90
30-49	80	85
50-69	75	80
70+	70	75
All adults	75	80
